

French / UK Grid Workshop London, November 3-4

GeoGrid

*Bruno Lévy, Project ISA
INRIA Lorraine & CNRS*

Action Incitative Concertée [ACI]
Globalisation des Ressources Informatiques
et des Données [GRID]

Overview

I Presentation of the project, goals

II Modeling AND Visualizing

III Communicating

- Future work

Academic Partners

I

- **CRPG – Nancy (Gocad)**
- **ECOO – Nancy (Cooperative work)**
- **LABRI – Bordeaux (Graphics)**
- **Geometrica (Prisme) – Sophia**

Industrial Partners

I

- **Petrobras, ChevronTexaco, TotalFinaElf**
- **SGI (Volumizer 2, VizServer)**
- **Earth Decision Sciences (Gocad)**
- **VSP-Technology (Cristal Earth, gOcad VR)**

Geomodeling

Oil companies: many activities

I

Exploration

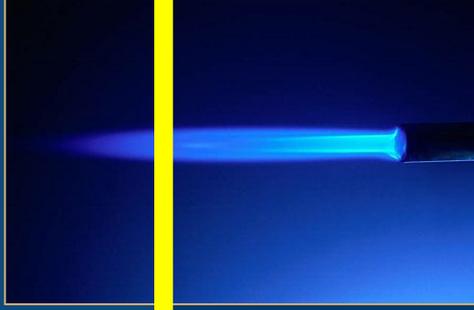

Production

Retail

Energy

Gas

Refining & Petrochemicals

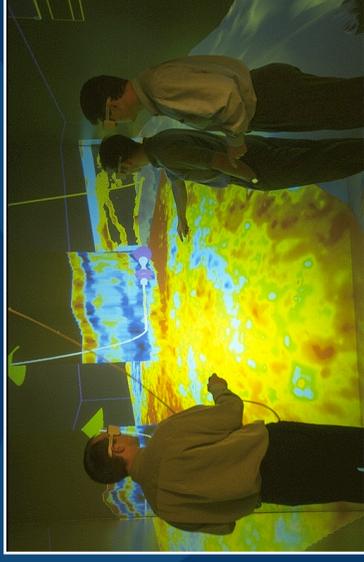

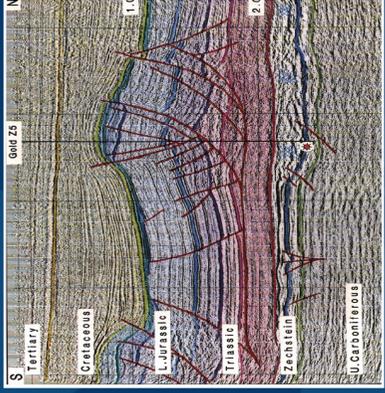

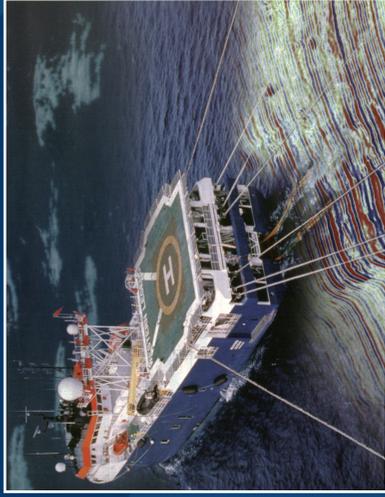

Transportation

Geomodeling

...many different areas of expertise

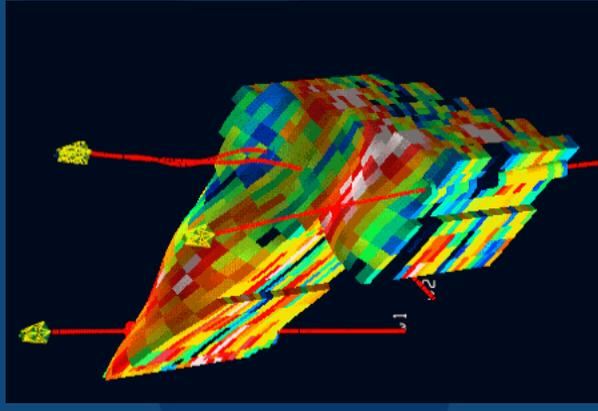

I

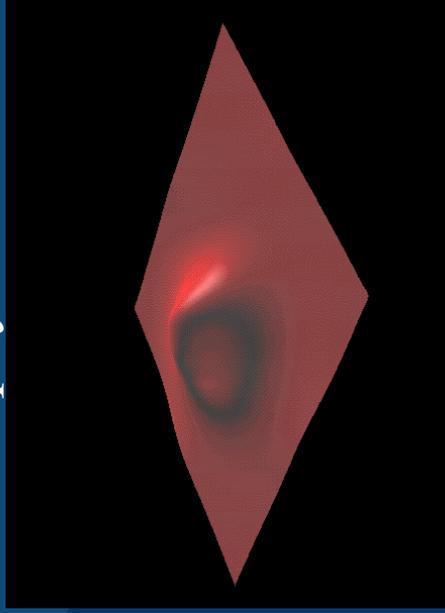

Geophysics

Seismic processing

Geostatistics

Structural geology

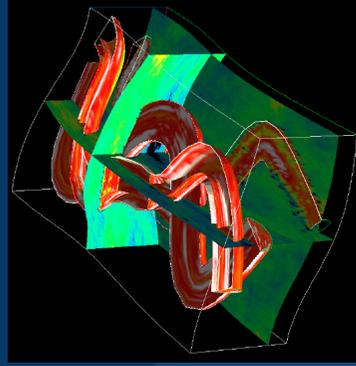

ACI GeoGRID

Images courtesy of Gocad

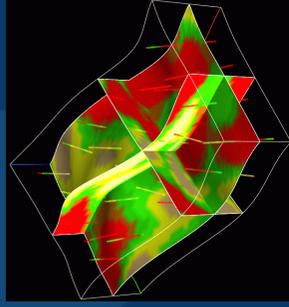

Geomodeling

...many different areas of expertise

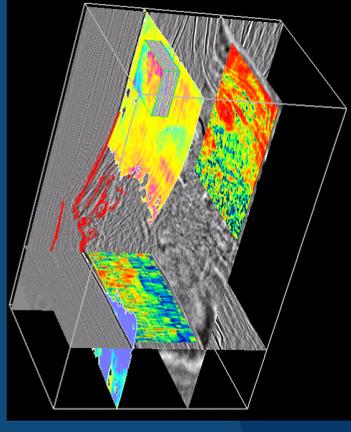

I

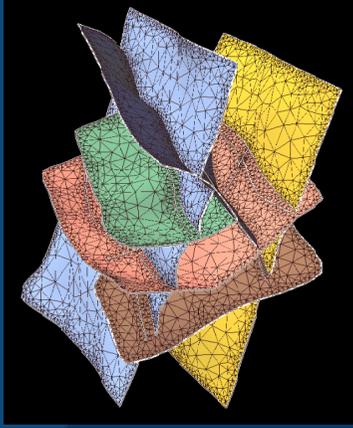

Structural geology

Reservoir engineering

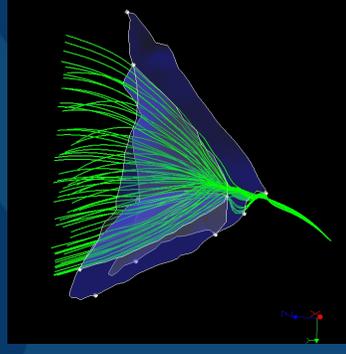

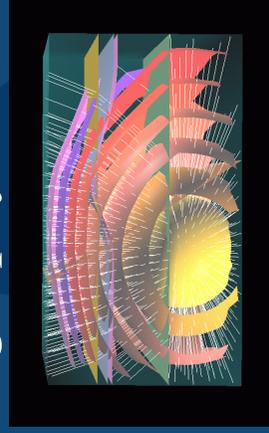

seismic processing

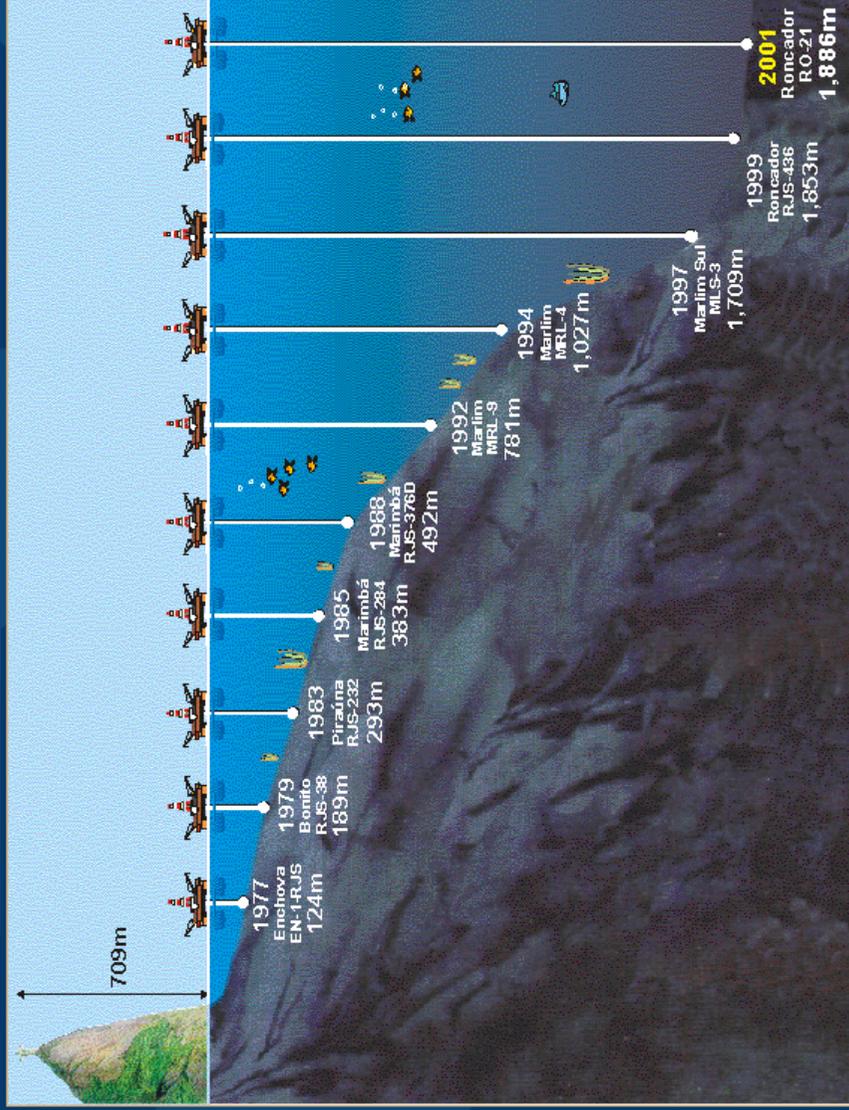

Large data

geophysics

Geomodeling

New challenges

Deep water wells
Polyphasic pumps
4D seismic

GRID Goals

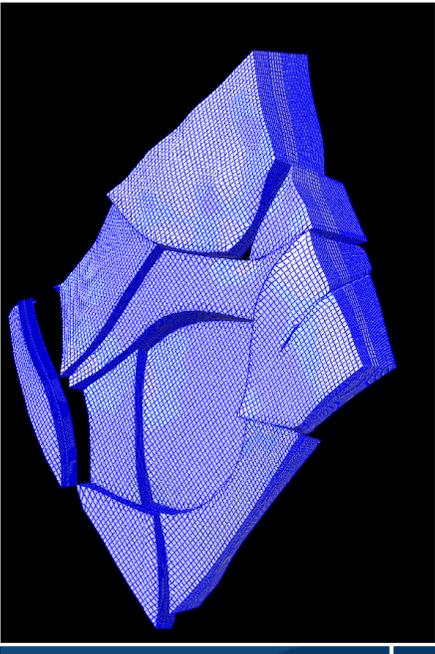

I

- **Combined Modeling and Visualization**
 - Real-time interactive visualization provides a better understanding of the modelling process
 - Enhanced modeling to improve the precision of what needs to be visualized
- **Communication**
 - Share the same view, different views and different representations of the same object
 - Modifying, editing shared versions of the same object

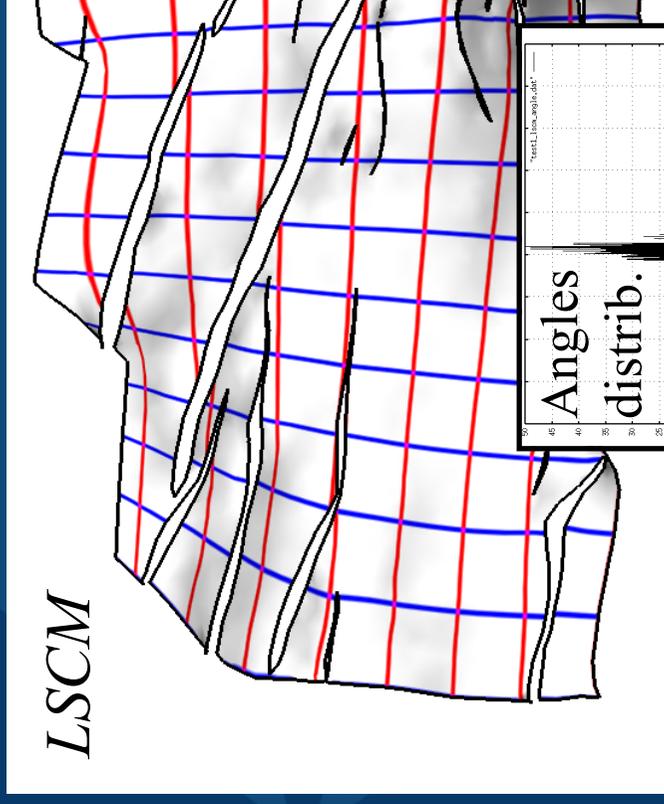

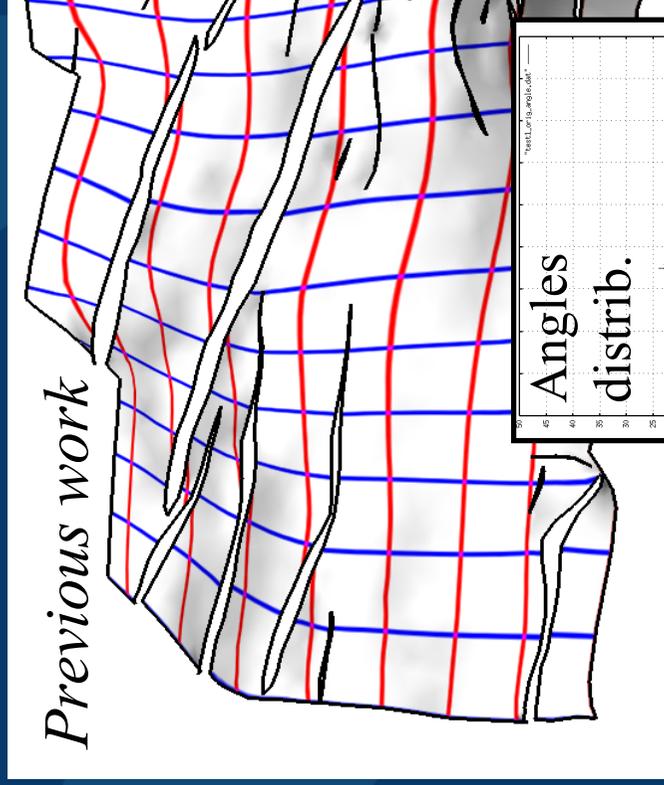

Modeling ...

$$\frac{\partial v}{\partial x} + i \frac{\partial v}{\partial y} = i \left(\frac{\partial u}{\partial x} + i \frac{\partial u}{\partial y} \right)$$

II

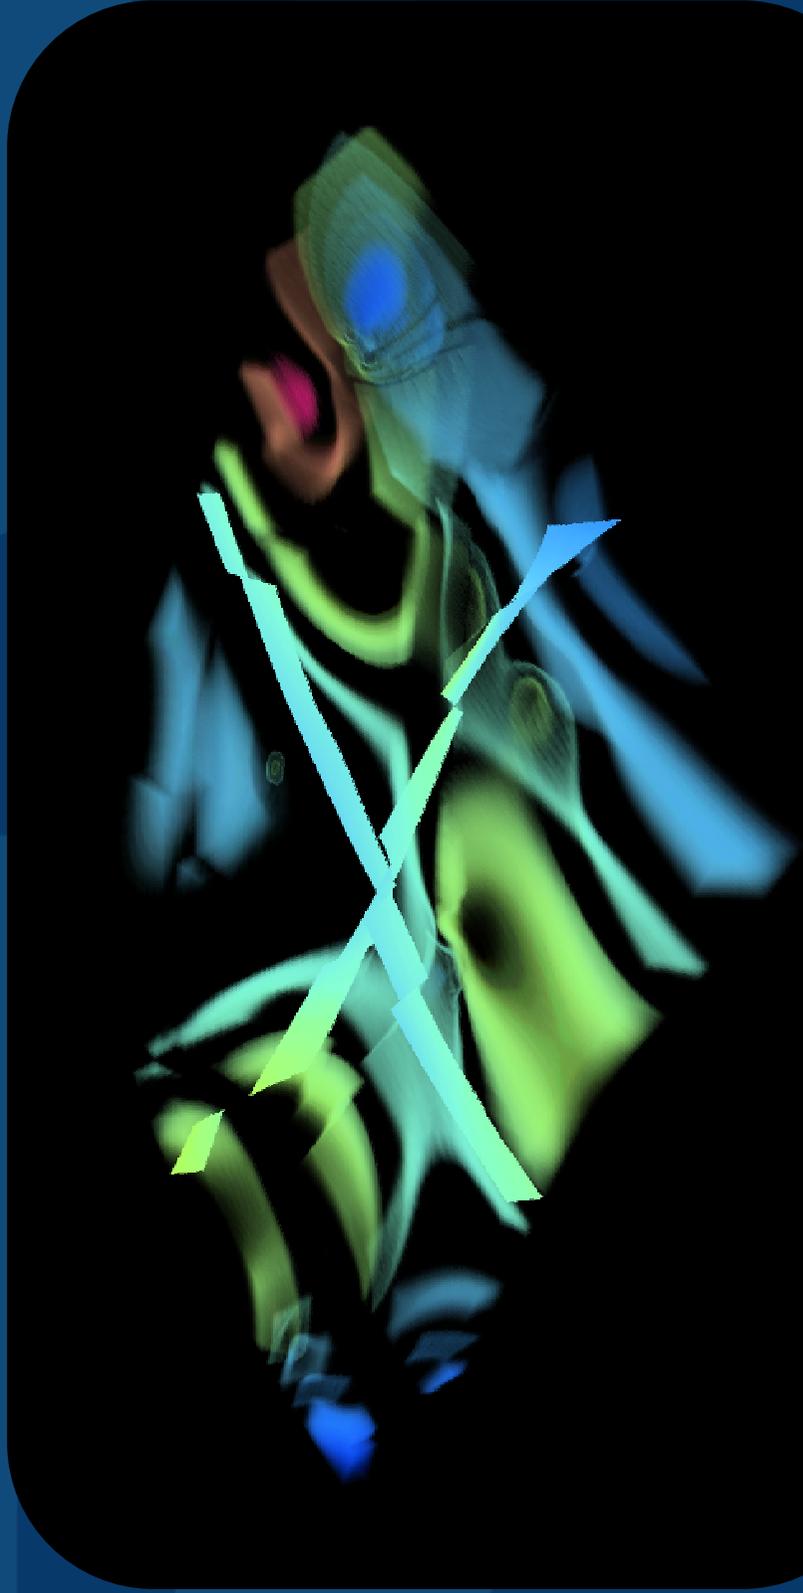

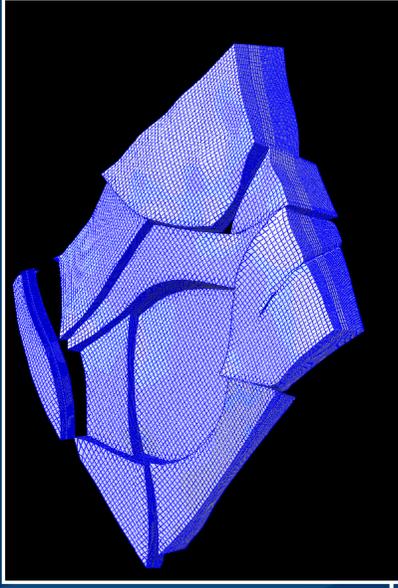

Conformal Gridding for flow PDEs (data courtesy of ChevronTexaco)

... and Visualizing

II

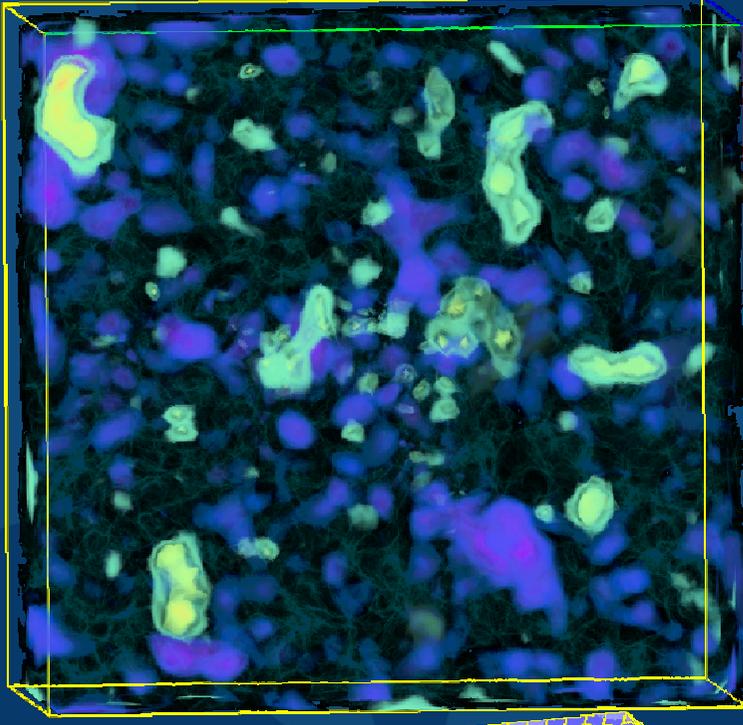

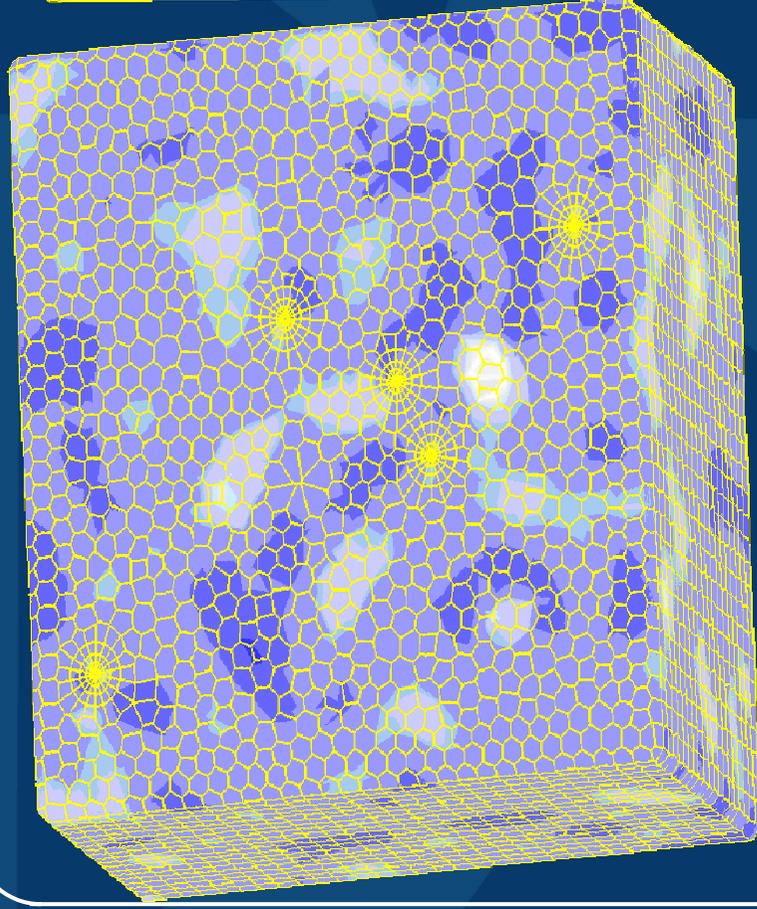

Data courtesy of Total-Elf-Fina

ACI GeoGRID

Modeling and Visualizing Unstructured adaptive meshes

II

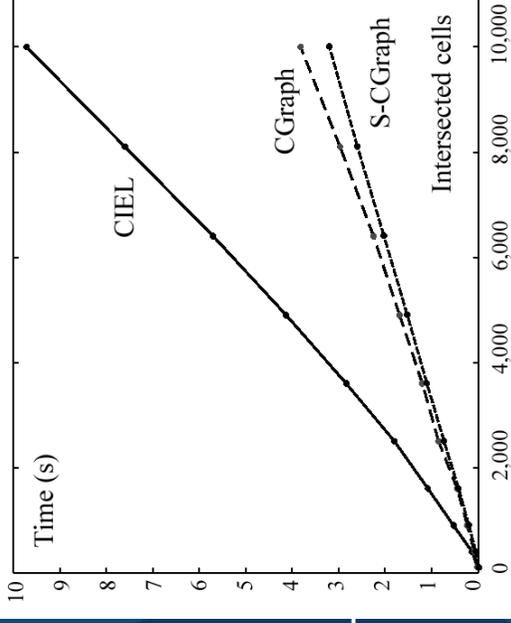

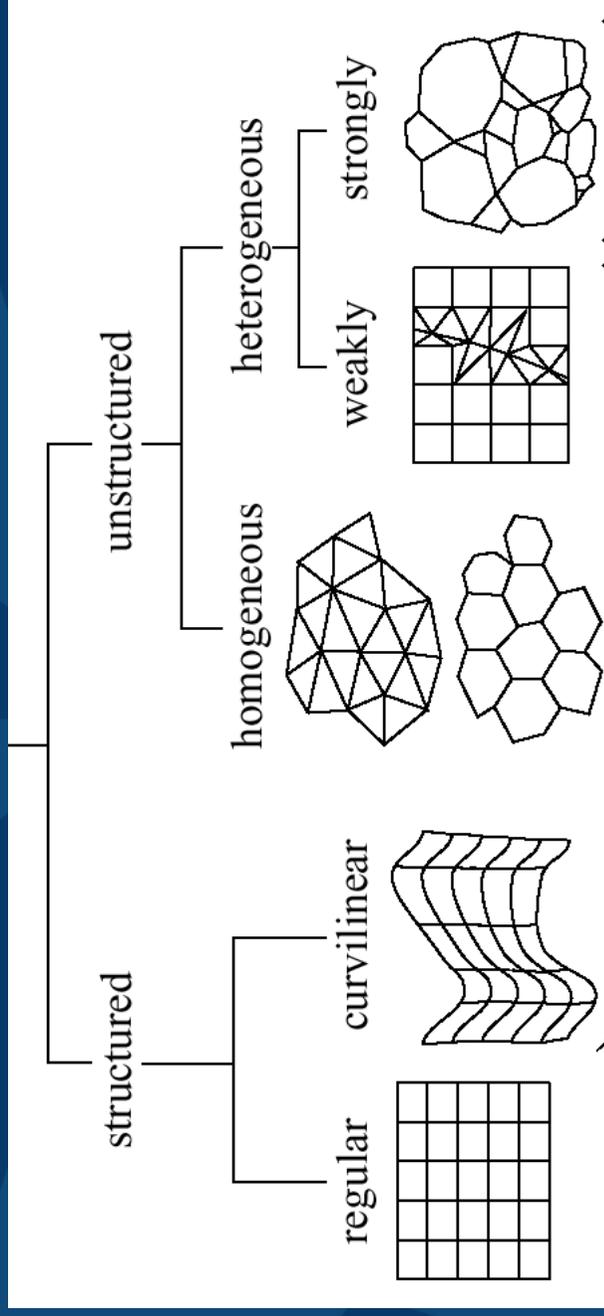

Heterogeneous unstructured meshes – CIEL

Control Volume Finite Elements (CVFE)
ACI GeoGRID

Modeling and Visualizing II

Volumic meshes typology

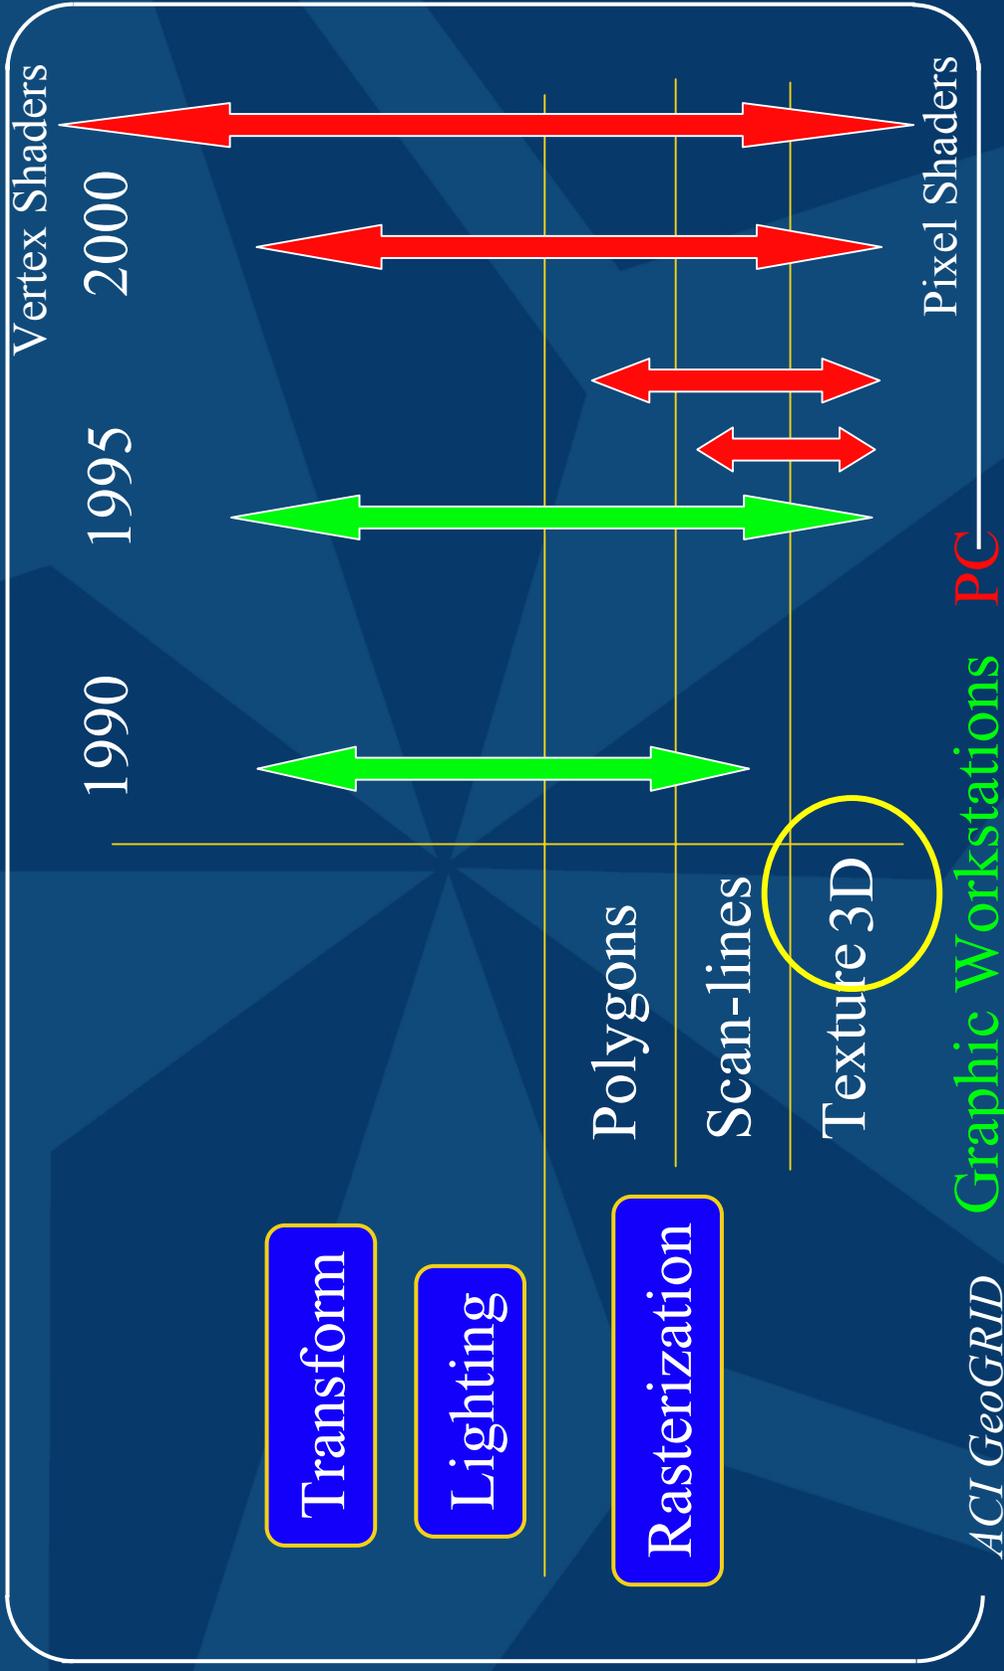

Modeling and Visualizing

II

Computer Graphics Hardware:

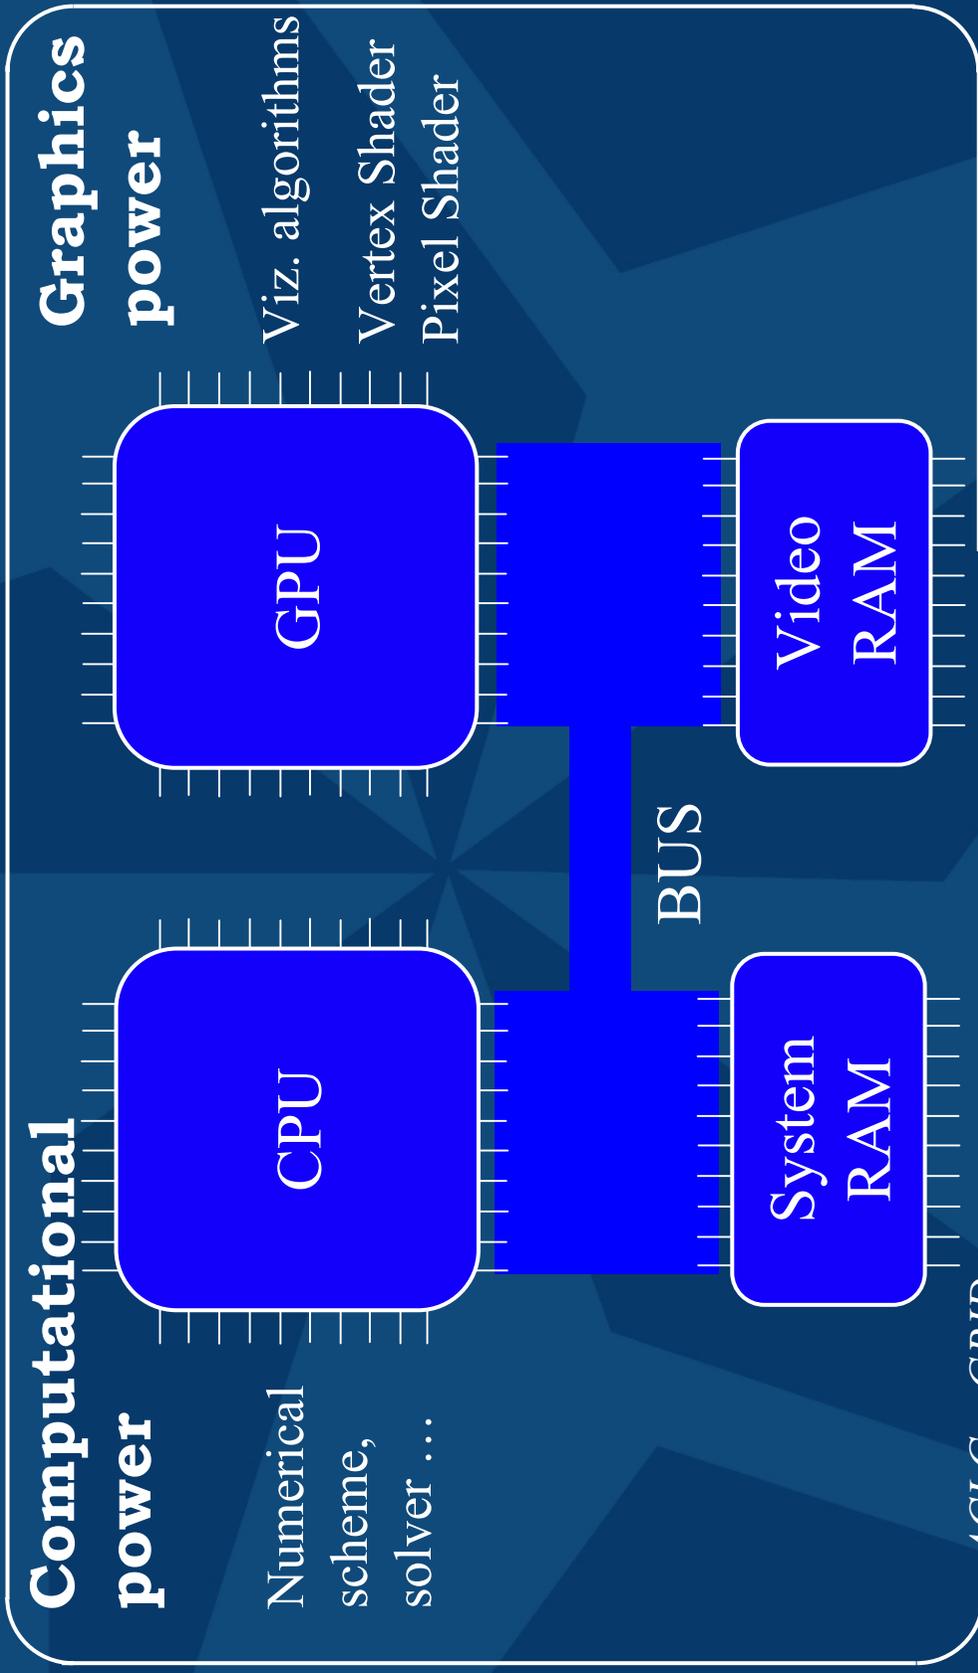

15 years of evolution

Modeling and Visualizing II

Computer Graphics Hardware:

The new picture in the 2Ks

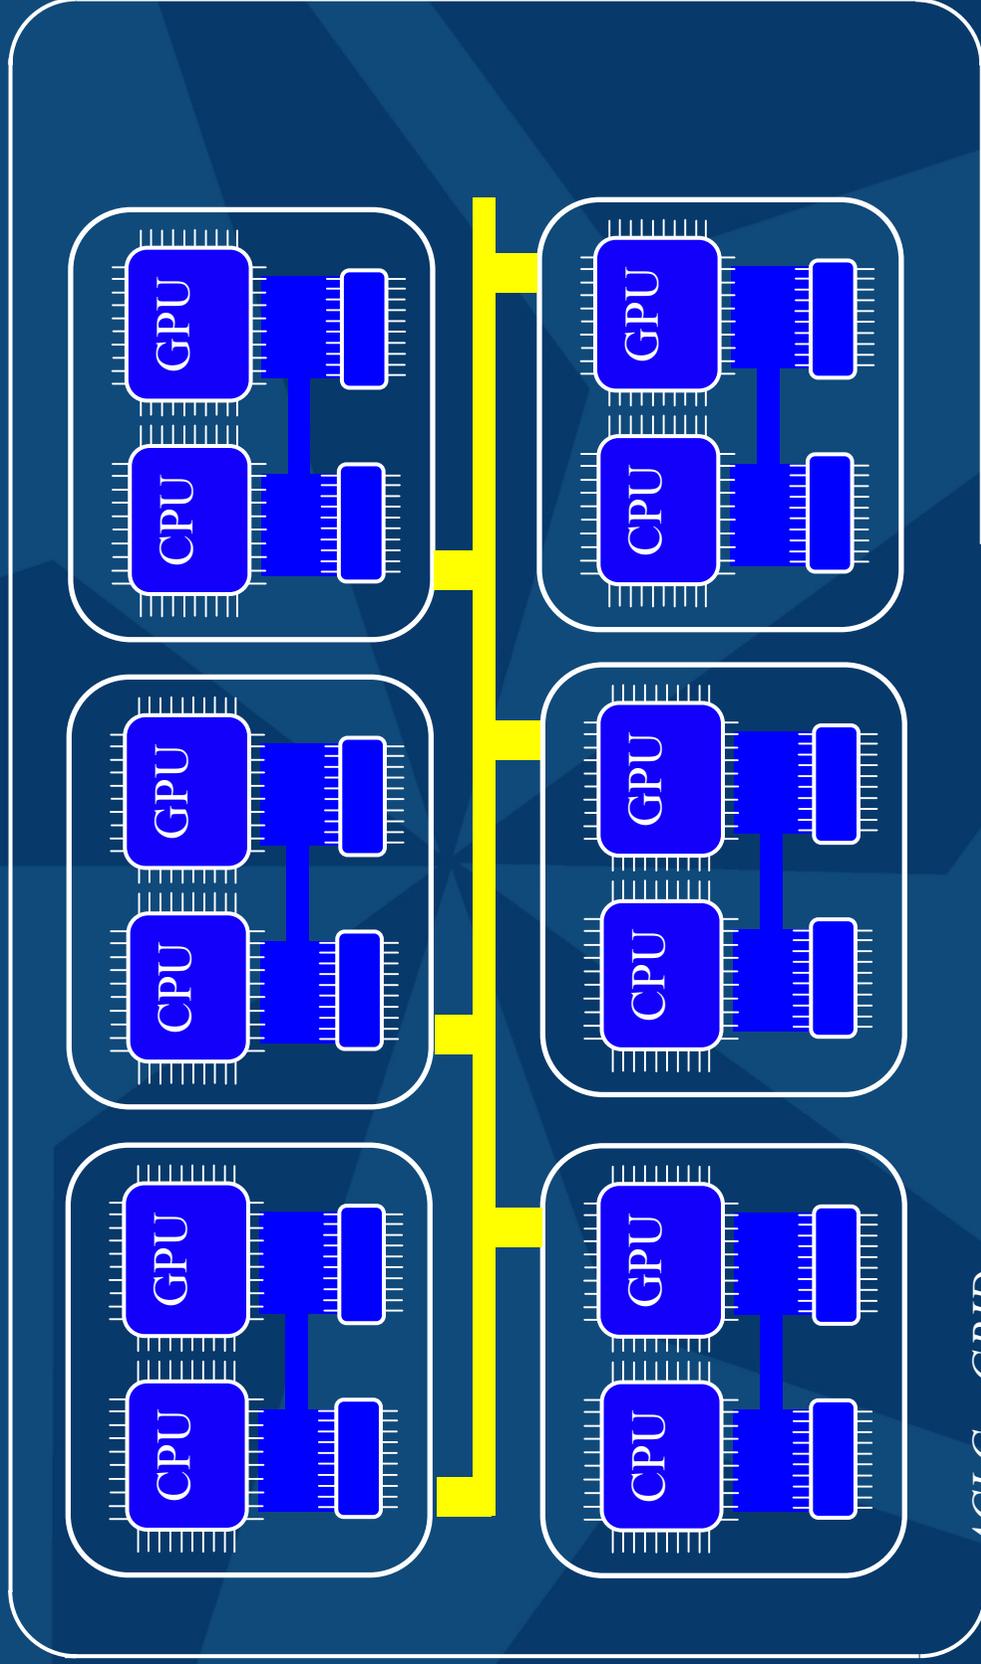

Modeling and Visualizing

II

Graphic grids

ACI GeoGRID

Modeling and Visualizing publications

II

VISUALIZING

- *Circular Incident Edge Lists*, B. Lévy, S. Conreux, G. Caumon & X. Cavin, *Visualization 2001*
- *Cellular Graphs*, G. Caumon, B. Lévy & J.C. Paul, *IEEE Trans. on Viz. And C.G.*, submitted

MODELING

- *Real-time raytracing with the GPU*, R. Toledo & B. Lévy, *to be submitted*
- *Least Squares Conformal Maps*, B. Lévy, S. Petitjean, N. Ray & J. Maillot, *Siggraph 2002*
- *Dual Domain Extrapolation*, B. Lévy, *Siggraph 2003*
- *Anisotropic Remeshing*, P. Alliez, D. Cohen-Steiner, O. Devillers, B. Lévy, M. Desbrun, *Siggraph 2003*
- *Differentially Constrained Parameterization*, B. Vallet, A. Sheffer, B. Lévy, *to be submitted (Siggraph 2004)*

ACI GeoGRID

Communicating Cooperative work

III

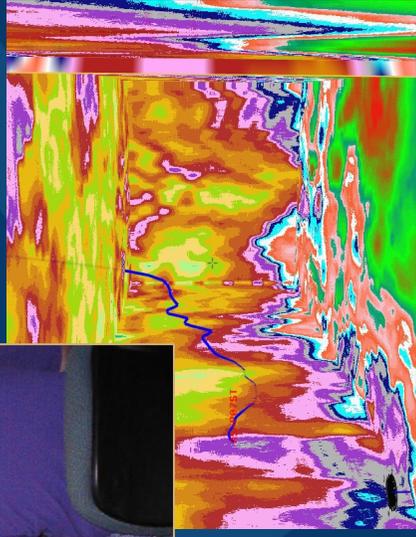

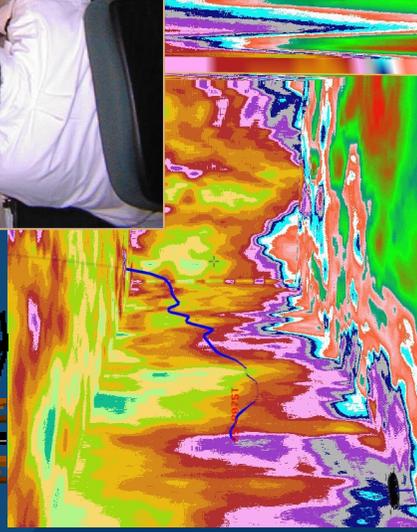

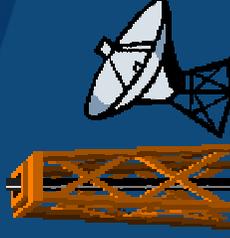

Luciano dos Reis

Gocad, Gocad VR

Gocad + Corba = GocadMeeting

Communicating Cooperative work

III

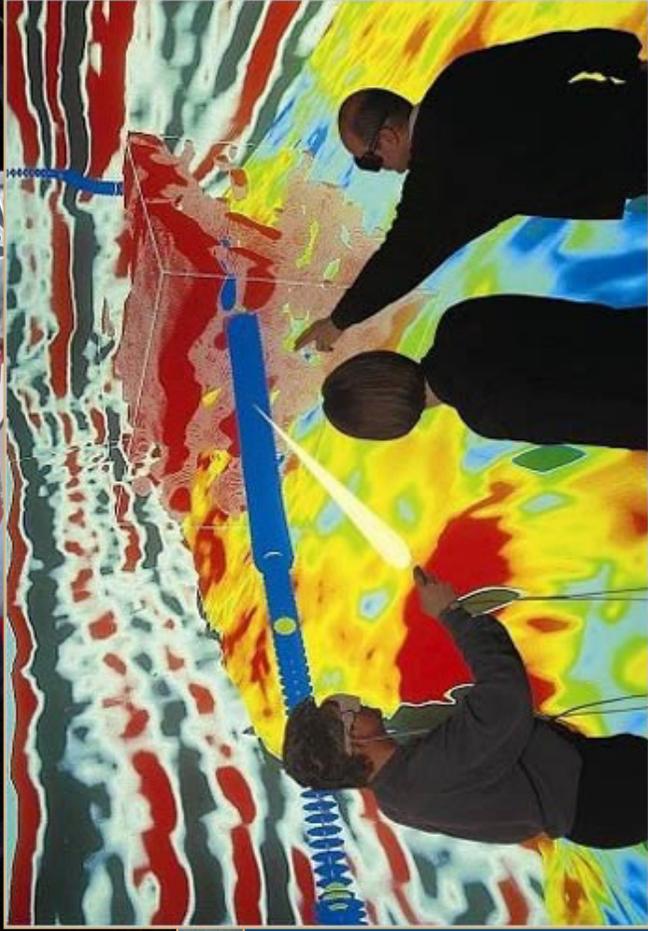

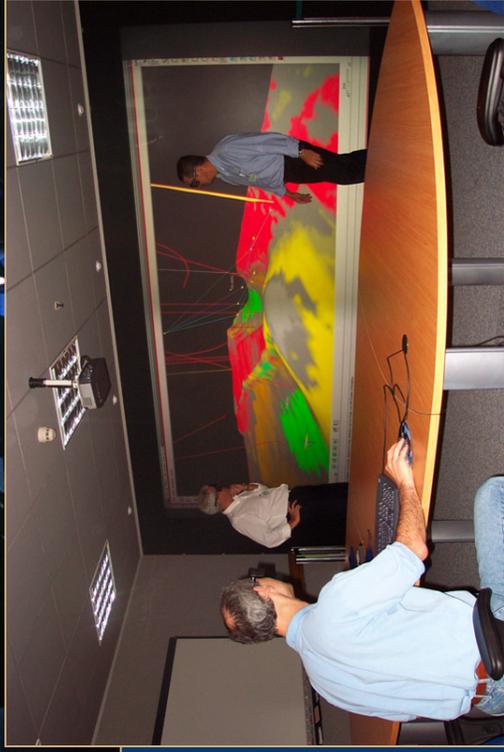

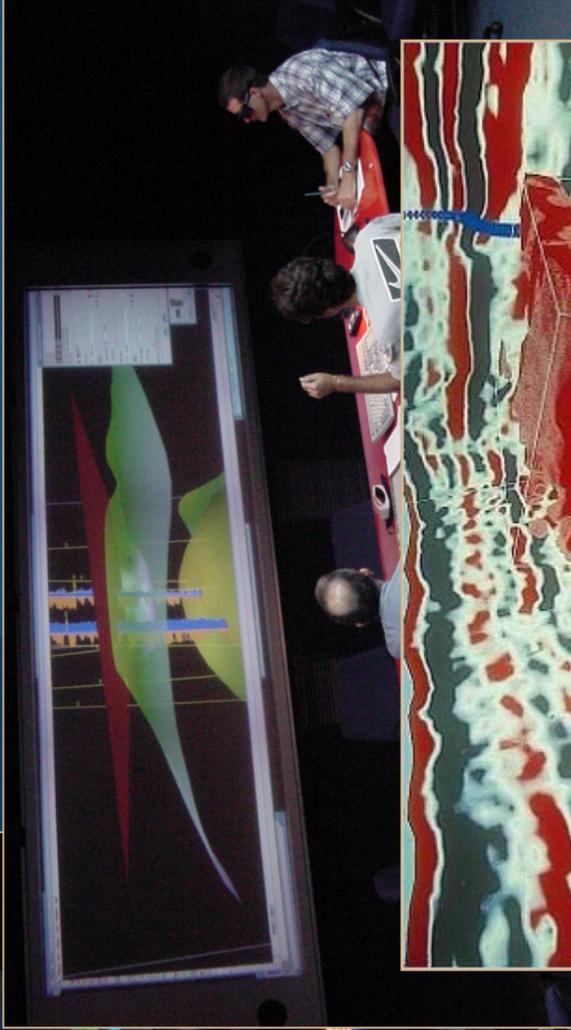

ACI GeoGRID

Luciano dos Reis, Petrobras

Communicating Cooperative visualization

III

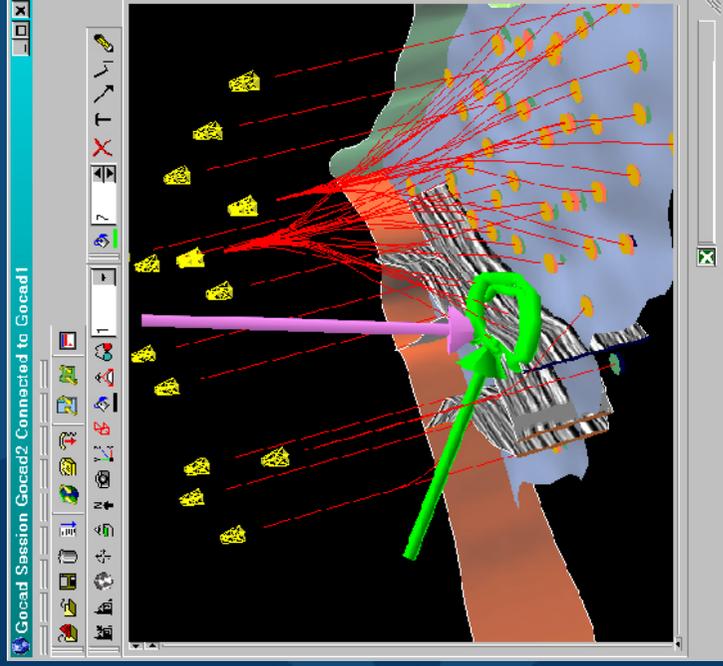

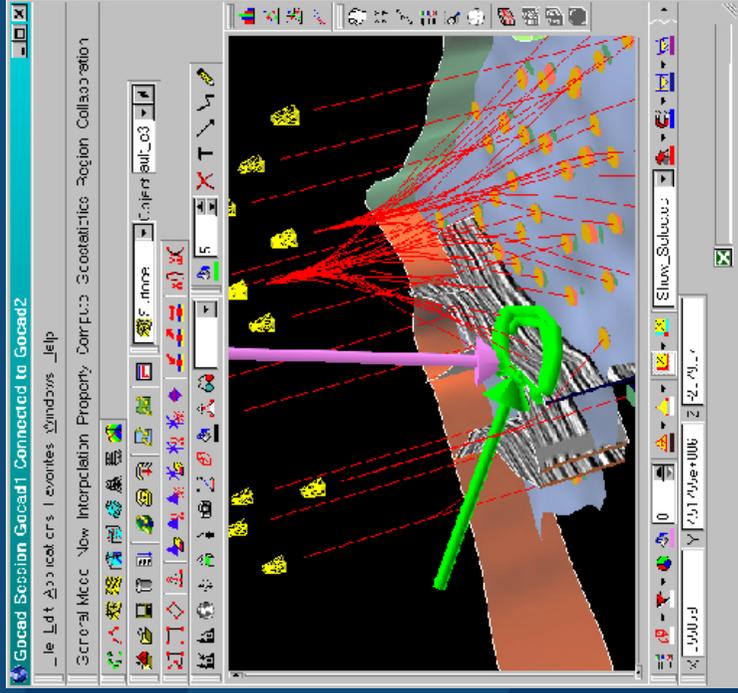

Gocad VR (VSP and EDS)

Communicating

Cooperative modeling - Whiteboards

III

« Gocad Meeting » : Collaborative geomodeling

ACI GeoGRID

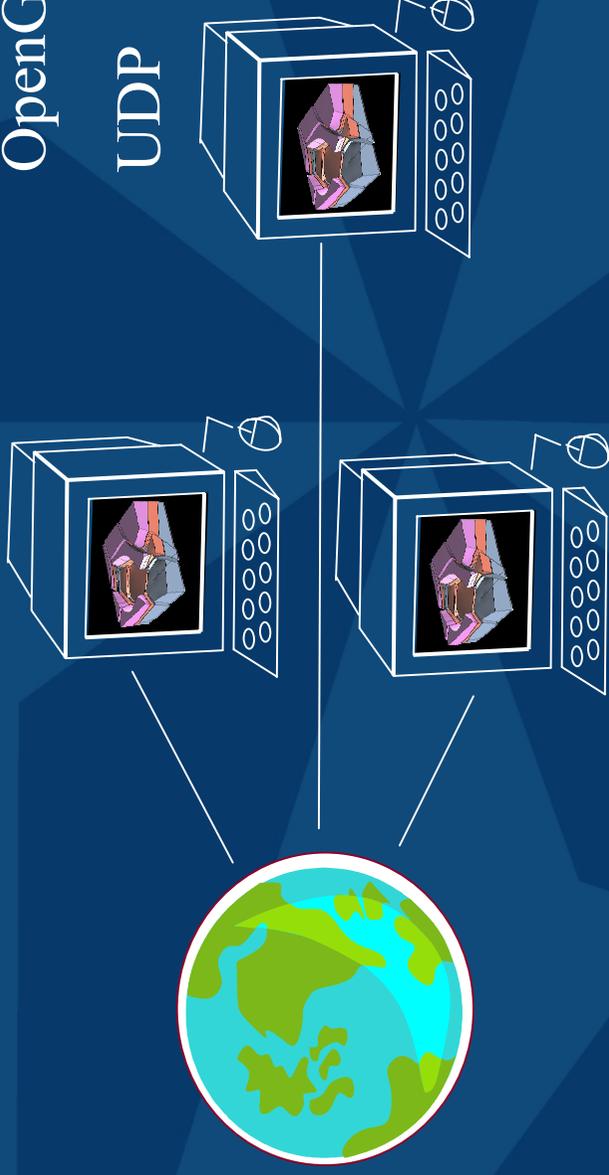

Luciano dos Reis (Petrobras) Fabien Bosquet (EDS)

Communication Grid-Visualization

III

OpenGL – Chromium

UDP

- *Unreliable Transport Protocol for Commodity Based OpenGL Distributed Visualization. S. Thibault, X. Cavin, O. Fester et E. Fleury, Workshop on Viz. Clusters – Visualization 2002*

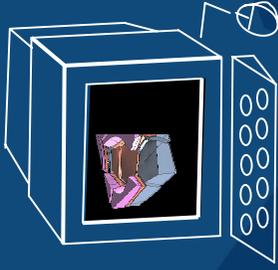

Communicating

Grid-Visualization

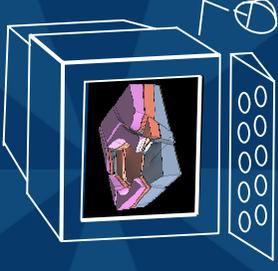

III

- **SGI Viz-Summit, La Villette**
(February 2003)

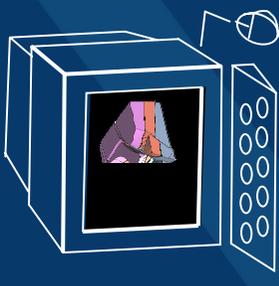

Loria

La Villette

Montpellier

Renater 2

Distrib. Vis.

OpenGL – Chromium

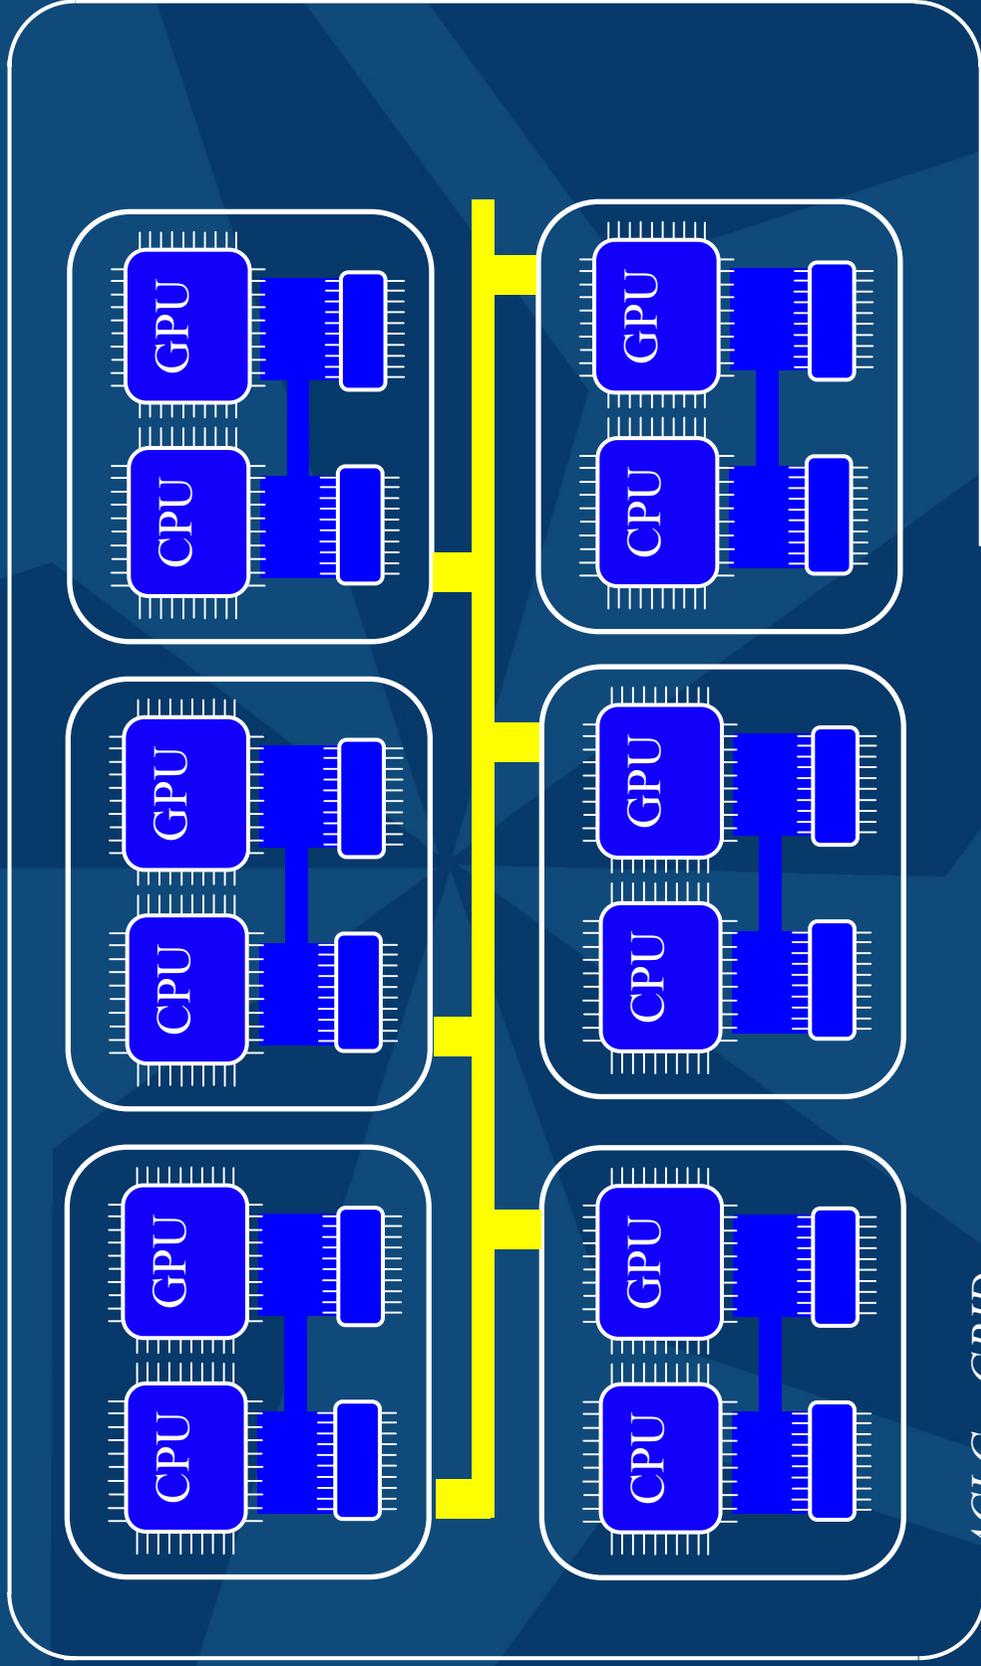

ACI GeoGRID

Communicating

Graphic grids

III

Xavier Cavin, PC Cluster

ACI GeoGRID

Communicating Computations and Network

III

- **Jérémie Turbet**
 - Visualizing on the grid (Chromium)
- **Alain Filbois : High-performance Viz.**
 - Parallel player for ultra high res. & stereo videos
- **Frédéric Wagner : Ph.D candidate Resedas (E. Jeannot) and ISA**
 - Computation on the grid (graph algo., data management and balancing)

Future work

- **Modeling & Computation**
 - High-performance numerical optimizations
 - (Multi-res. LSCM, // LSCM, // DSI)
 - Adaptive heterogeneous meshes
- **Visualizing**
 - Graphic grid, Graphic PC Clusters (3D Texture, Vertex & Pixel Shaders)
 - // CIEL, // C-Graph
