

CALL FOR PAPERS

MDM/KDD2005 - Sixth International Workshop on Multimedia Data Mining (August 21, 2005)

in conjunction with [KDD 2005](#): The Eleventh ACM SIGKDD International Conference on Knowledge Discovery and Data Mining. August 21-24, 2005 Chicago, IL, USA

MDM/KDD2005 WORKSHOP THEME: "Mining Integrated Media and Complex Data"

Paper submission due 31 May 2005

Workshop Website	http://www-sop.inria.fr/axis/mdm-kdd05/MDM05.htm
Workshop contact	<ul style="list-style-type: none">• Fatma.Bouali@univ-lille2.fr• lkhan@utdallas.edu• florent.masseglia@sophia.inria.fr
Workshop Date	21 August, 2005

WORKSHOP CHAIRS

Fatma Bouali – University of Lille2, France
email: Fatma.Bouali@univ-lille2.fr

Latifur Khan – University of Texas at Dallas
email: lkhan@utdallas.edu

Florent Masseglia – INRIA Sophia Antipolis, France
email: florent.masseglia@sophia.inria.fr

WORKSHOP STEERING COMMITTEE

Chabane Djeraba - University of Sciences and Technologies of Lille, France
Valery A. Petrushin Accenture Technology Labs, USA
Simeon J. Simoff - University of Technology Sydney, Australia

WORKSHOP PROGRAM COMMITTEE (to be confirmed)

Ramazan S. Aygun	University of Alabam, Huntsville
John Risch Battelle	Pacific Northwest National Lab, USA
Omar Boussaid	University of Lyon 2, France
K. Slecuk Candan	Arizona State University, USA
Claude Chrisment	University of Toulouse, France
Chitra Dorai	IBM Thomas J. Watson Research Center, USA
Alex Duffy	University of Strathclyde, UK
Pierre Gançarski	University of Strasbourg, France
William Grosky	University of Michigan, USA
Howard J. Hamilton	University of Regina, Canada
Wynne Hsu	National University of Singapore, Singapore
Oktay Ibrahimov	Institute of Cybernetics, Azerbaijan
Manfred Jeusfeld	Tilburg University, Netherlands
Joemon M Jose	University of Glasgow, UK
Odej Kao	Technical University of Clausthal, Germany
Paul Kennedy	University of Technology-Sydney, Australia
Brian Lovell	University of Queensland, Australia
Mark Maybury	MITRE Corporation
Dennis McLeod	University of Southern California, USA
Dunja Mladenic	J. Stefan Institute, Slovenia
Milind Naphade	IBM T.J. Watson Research Center, USA
Mario Nascimento	University of Alberta, Canada
Monique Noirhomme-Fraiture	Institut d'Informatique, FUNDP, Belgium
Andreas Nürnberger	University of Magdeburg, Germany
Vincent Oria	New Jersey Institute of technology, USA
Tom Osborn	The NTF Group, Australia
Balakrishnan Prabhakaran	University of Texas at Dallas
Christian Preda	University of Lille 2, France
Simone Santini	University of California, San Diego, USA
John R. Smith	IBM T. J. Watson Research Center, USA
Yuqing Song	The University of Michigan at Dearborn
Sundar	Venkataraman (Rockwell Scientific Corporation)
Zhaohui Tang	Microsoft, USA
Brigitte Trousse	INRIA Sophia Antipolis, France
Duminda Wijesekera	George Mason University, USA
Wensheng Zhou	Hughes Research Lab, USA
Djamel Zighed	University of Lyon 2, France

DEADLINES

Submissions Due:	31 May, 2005
Acceptance:	21 June, 2005
Camera ready copy:	11 July, 2005
Workshop Day:	21 August, 2005

WORKSHOP MISSION

This year the Multimedia Data Mining workshop will bring together a diverse group of academics and industry practitioners in integrated state-of-art analysis of digital media content, multimedia database systems and multimedia data streams. The workshop will address issues specifically related to mining information from multi-modality, multi-source, multi-format data in an integrated way. This workshop also focus on semantic understanding of multimedia content, and knowledge discovery in other complex data. Many analysis domains collect data from several sources, including static databases, streaming data, web pages, or conditionally collected data. Data appear in multiple forms, including structured, numeric, free text, video, image, speech, or combinations of several types. Analysis in these domains requires combining of techniques and integrating methods.

TOPICS OF INTEREST

The major topics of the workshop include but are not limited to the following groups:

- Integrated mining of different data formats (text, speech, video, structured, image, relational data)
- Combining mining results from different sources
- Integrated mining methods for eBusiness
- Combined mining methods for engineering and manufacturing
- Integrated mining for Homeland Security
- Mining of data streams combined with structure data
- Visual data mining of multi-format/ Multimedia data
- Multi-relational Data Mining. The focus is on mining data residing in relational databases.
- Visual data mining of multi-format/multimedia data.
- Theoretical frameworks for multimedia data mining.
- Multimedia data mining methods and algorithms.
- Multimedia data sampling and preprocessing.
- Data visualization and sonification.
- Representation and reuse of discovered knowledge.
- Multimedia data descriptions languages and formats.
- Evaluation of 'interestingness', 'novelty' and validity of results.
- Topic and event detection in multimedia data (including video).
- Extracting semantics from multimedia databases.
- Mining scientific multimedia data.
- Integrated data mining in multimedia information systems.
- Knowledge discovery in facial data.
- Man-machine interfaces for multimedia data mining.
- Complexity, efficiency and scalability of multimedia data mining algorithms.
- Data mining virtual communities and virtual worlds.
- Data mining in collaborative virtual environments and virtual reality systems.

- Visual and audio support for multimedia mining.
- Visual data mining of multimedia data.
- Multi-agent environments for concurrent mining of heterogeneous data.
- Real-time multimedia data mining systems.
- Using MPEG-4 and MPEG-7 standards for multimedia data mining.
- Semantic content analysis for multimedia retrieval
- Multi-modal multimedia retrieval
- Retrieval of multimedia semantics
- Multimedia retrieval for pervasive devices
- Semantic web and annotation
- Mining and analysis of data generated by virtual reality systems,
- Discovery in musical data,
- Knowledge Discovery in other complex data (Spatial, VRML, XML, etc.),

Software demonstrations are welcome. We encourage submissions of ‘greenhouse’ work, which present early stages of cutting-edge research and development.

SUBMISSION

There is no restriction on the length of submissions. Contact author and email address should be specified. Electronic submissions of papers in PDF, PS, RTF or Microsoft Word Document formats are preferable. Submission templates are available at the workshop website. The electronic submission can be done via the conference management system at the workshop website or by email to the Workshop contact (Fatma.Bouali@univ-lille2.fr, lkhan@utdallas.edu, florent.masseglia@sophia.inria.fr)

DISSEMINATION

Peer-reviewed papers, accepted for presentation at the workshop will be published in the workshop proceedings. The workshop organisers plan to publish an edited collection of longer and revised contributions, either as a special issue of related journal or as an edited book.

For details, please, visit the workshop Web site at:
<http://www-sop.inria.fr/axis/mdm-kdd05/MDM05.htm>
