6. Bibliography

General Texts and Journals

Goldstein, Fred R., *ISDN in Perspective*, Addison-Wesley Publishing Co., 1992.

The book provides a user-centered view of ISDN to explain ISDN applications and related protocols/standards. The author analyzes the current ISDN technology and takes a glimpse at Broadband ISDN and other highspeed networks.

Heldman, Robert K., *Global Telecommunications-Layered Networks' Layered Services*; McGraw-Hill, Inc., 1992.

Focuses on the latest in communications technology and services to achieve information internetworking on both a local and global scale. The book deals with the advanced data networks-derived service possibilities-narrowband, wideband, and broadband- and discusses new products for specific user applications.

Hermann Helgert, *ISDN: Architectures, Protocols, Standards,* Addison-Wesley Publishing Co., 1991

Kessler, Gary C., *ISDN,* McGraw-Hill, Inc., 1990.

Presented in a clear and easy-to-understand style, this book provides a comprehensive description of ISDN standards, services, and products. Product developers and end users alike will find this book a valuable reference for the communications applications of the future.

Nolle, Thomas, *ASI - A New Kind of ISDN Standard*, Business Communications Review, Volume 22, Number 1, January 1992.

Perlman, Radia, *Interconnection: Bridges and Routers*, Addison - Wesley Publishing Company, Inc., 1992.

This book addresses data communication networking with a focus on networking components, their functions, and application to interconnecting heterogeneous networks. Several chapters are devoted to describing components used to support ISDN applications.

Ronayne, John; *Integrated Services Digital Networks: from Concept to Application,* John Wiley & Sons, Inc., 1988.

After an introductory chapter on ISDN, the book describes the "tools" of ISDN in view of national and international standardization activities. Several chapters in the book are devoted to investigating the technical and regulatory issues as they pertain to ISDN implementation.

Rutkowski, Anthony M., *Integrated Services Digital Networks,* Artech House, Inc., 1985.

This book describes the basic concepts of ISDN, domestic and international standardization activities, and a futuristic view of potential services provided by ISDN. In addition to a basic primer on ISDN, it provides an extensive bibliographic listing of published articles and papers relating to ISDN

White, Gene, *Internetworking and Addressing* ; McGraw-Hill, Inc., 1992.

This book explains the data standards addressing fields and provides examples of standard-based implementations. The main focus of the book is to address naming and addressing techniques for subnetworks and internetworks that are based on national and international standards.

Stallings, William, *Networking Standards* , Addison-Wesley Publishing Co., 1993.

Thorpe, Nicolas M., *X.25 Made Easy* , Prentice Hall, 1992.

An easy to-read guide to X.25, the book explains some of the more complex data that is provided by the X.25 equipment vendors. Students will find the plain but technically enriched language and numerous practical examples invaluable.

Varma, Promode K., editor, *ISDN Systems: Architecture, Technology and Applications* , Prentice Hall: New Jersey, 1990.

ISDN Solutions and Applications

European Conference of Postal and Telecommunications Administrations, *User Handbook of ISDN,* 1992.

A status summary of ISDN implementation and user services of several European nations. The handbook also describes international ISDN connections.

Information Gatekeepers, Inc., *ISDN Handbook and Buyer's Guide,* 1992.

Information Gatekeepers, Inc., *ISDN Tariffs in North America, Volumes 1 and 2*, 1992.

Information Gatekeepers, Inc., *ISDN Yellow Pages,* Boston, Mass., 1992.

Intertec Publishing, *Telephony's Public Network Technology Source* , 1992

Phillips Publishing, Inc., *ISDN Buyer's Guide and Sourcebook*, 1990.

Phillips Publishing, Inc., *1992 Telephone Industry Directory,* 6th Annual Edition.

Fritz, Jeffery,*Sensible ISDN Data Applications,* West Virginia University Press, 1992.

Telecom Canada, *A Compendium of ISDN Applications*, 1991.

This compendium is very similar in concept and implementation to the Catalog in which you find this reference.

Telecom Canada, *Microlink ISDN Solutions, Version 1.0*, 1992.

A tool for the Telecom Canada account teams, this document describes the features of BRI solutions offered by Telecom Canada for user applications.

Gale Research Inc., *Telecommunications Directory*, Fifth Edition, 1992-93.

Financial Justification Articles and Studies

Belitsos, Byron, *ISDN: Real Economies, Real Applications*, Computer Decisions, June, 1988.

Borthick, Sandra, *Is ISDN for Data?*, Business Communications Review, September, 1989.

Bushaus, Dawn, *Coming: ISDN Minus Centrex*, Communications Week, July 2, 1990.

Bushaus, Dawn, and Travis, Paul, Users Find ISDN Pays Off, Telephony, February, 1990.

Gifford, Warren, *ISDN Performance Trade-offs*, Telecommunications, April, 1988.

Telecommuter Finds Home ISDN "Best Kept Secret in the World", ISDN News, May 20, 1992.

Johnston-Turner, Mary, *Evaluating ISDN Options*, Network World, March 18, 1991.

Kanupke, William, *Real ISDN Payoff Lies in Applications*, MIS Week, January 23, 1989.

Knight, Peter, *Market Forces Affecting ISDN*, Business Communications Review, May-June, 1988.

McCoy, Ralph, *Voice/Data Communications Case Study,* NCR Connection, March, 1992.

Nolle, Thomas, *Examining ISDN's Bottom Line*, Communications Consultant, August, 1988.

Wright, Ray, *Can Data Applications Drive ISDN?*, Telephony, July 16, 1990.

Yankee Group, *Residential ISDN: Using and Paying for Narrowband*, 1991.

Telecommuting

Transportation Implications of Telecommunicating, U.S. Department of Transportation, April 1993

Impacts of telecommuting on transportation, etc. and a compilation of reports from demonstration projects across the U.S.

The Federal Flexible Workplace Pilot Project Work-At-Home Component Final Report, U.S. Office of Personal Management, January 1993

Evaluation of the Flexiplace project results showing a high degree of satisfaction with the project.

*Puget Sound Telecommuting Demonstration Interim Repor*t, Washington State Energy Office, April 1992

Preliminary analysis show many indications of improved organizational functioning and productivity gains.

1993 Telecommuting Data, LINK Resources Corporation, New York, June 1993

Lists telecommuting numbers and projections for the United States.

Lynie Arden, *The Work-at-Home Sourcebook*, Live Oak Publications, Boulder, Colorado, 1992

Gives an overview of successful, on-going telecommuting programs in corporate America.

Stephen K. Finlay, *BC Tel/Bentall Satellite Office Trial Final Report and Recommendation* - Enhanced Management Options, British Columbia Telephone, July 1992

Recommends development of a business based on providing multi-tenant telecenters, as well as a continuation of an internal telecenter.

Marsha L. Fuller, *Telecommuting Sounds Nice...But, What's in it for Me?*, Telecommuting Solutions Group, July 1992

Lists benefits of telecommuting to the employer, the employee and the taxpaying public.

Patricia L. Mokhtarian, *Defining Telecommuting Research Report*, Transportation Research Board, University of California, Davis, 1991

Clarifies the definitions of telecommuting and its various subforms.

Gil E. Gordon and Marcia M. Kelley, *Telecommuting: How to Make it Work for You and Your Company*, Englewood Cliffs, New Jersey, Prentice-Hall, 1986

Guide for implementation of a company's telecommuting program.

Rural America at the Crossroads: Networking for the future, U.S. Congress, Office of Technology Assessment, OTA-TCT-471, Washington, DC, April 1991

Student telecommunications needs and possibilities in rural America.

Arthur D. Little, *Can telecommunications Help Solve America's Transportation Problems?*, May 1991

Estimates $23.2 billion in annual benefits if 10-20% of activities currently requiring transportation are performed using telecommuting.

Martin K. Barrack, *Flexplace Questions and Answers on Computer and Telephone Issues*, Policy and Regulations Division, Information Resources Management, U.S. General Services Administration, November 1991

Addresses computer and communications issues that arise when a working at home, on travel, on detail, or at a satellite office.

Standards

ANSI T1.216 *ISDN Management-Basic Rate Physical Layer*, 1991.

ANSI T1.601 *Telecommunications-ISDN Basic Access Interface for Use on Metallic Loops for Application on the Network side of the NT*, 1989

ANSI T1.602 *Telecommunications-ISDN Data Link Layer Signaling Specification for Application at the User Network Interface*, 1989

ANSI T1.604 *Minimal Set of Bearer Services for the ISDN Basic Rate Interface*, 1990.

ANSI T1.605 *Telecommunications-ISDN Basic Access Interface for S and T Reference Points*, 1989

ANSI T1.606 *Frame Relaying Bearer Service-Architectural Framework and Service Description*, 1991.

ANSI T1.607 *Digital Subscriber Signaling System No. 1 (DSS1) - ISDN Layer 3 Signaling Specification for Circuit Switched Bearer Service,* 1990.

ANSI T1.608 *Digital Subscriber Signaling System No. 1 (DSS1) - Signaling Specification for X.25 Packet Switched Bearer Service,* 1991.

ANSI T1.610 *Telecommunications-Digital Subscriber Signaling System Number 1: Generic Procedures for the Control of ISDN Supplementary Services,* 1990

ANSI T1.617 *DSS1-Signaling Specification for Frame Relay Bearer Service*, 1991.

ANSI T1.618 *DSS1-Core Aspects of Frame Protocol for Use with Frame Relay Bearer Service*, 1991.

ANSI TIA TR-41.4, ST-3014 *Aggregation of Multiple Independent 56 kbps or 64 kbps Channels into a Synchronized Wideband Connection*, Draft, June 1993.

NIUF Documents

The NIUF Secretariat maintains source materials on all the registered user applications listed in Annex 2. In addition, the NIUF Secretariat can distribute copies of documents, e.g. implementation agreements, which have been approved by the NIUF but are not yet published.

ATLAS for TRIP'92, CM Publishing, 1992.

Highlights of the NIUF/COS sponsored Transcontinental ISDN Project 1992 demonstrating a uniform implementation of National ISDN-1.

NIST Special Publication 500-189, *Security in ISDN*, NTIS Order Number PB92-189.

This document discusses standards needed to implement user security in ISDN technology. The publication provides a broad discussion of user security needs and suggests possible solutions.

NIST Special Publication 500-194, *ISDN Conformance Testing Layer-1 Physical Layer Part 1 - Basic Rate S/T Interface, User Side*, NTIS Order Number PB92-102201.

This document describes a set of test specifications that test conformance of Terminal Equipment and Network Termination's to the ISDN physical layer at the S/T reference point, as defined in ANSI T1.605-1989.

NIST Special Publication 500-195, *North American ISDN Users' Forum Agreements on ISDN*, NTIS Order Number PB92-102219.

This document compiles the existing NIUF agreements for ISDN as developed and approved by the NIUF as of November 1990.

NIST IR 89-4160, *Trial of Open System Interconnection (OSI) Protocols Over ISDN*, NTIS Order Number PB89-235576.

This report contains the results of a trial demonstration of OSI protocols over ISDN. NIST organized the trial to demonstrate the use of ISDN as a lower layer technology for OSI applications. The trial was a first step for including ISDN as a lower layer technology in the Government Open Systems Interconnection Profile (GOSIP) Version 2.

NIST Special Publication 823-1, *An Overview of ISDN Conformance Testing*, GPO Stock Number SN003-003-03142-9.

This document introduces a series that focuses on conformance test specifications for the various ISDN protocols. The publication provides an outline of abstract test suites for ISDN and discusses the current status of ISDN conformance testing and related issues.

NIST Special Publication 823-2, *ISDN Conformance Testing Layer-1 - Physical Layer Part II - Basic Rate U Interface, User Side*, GPO Stock Number SN003-003-03143-1.

This document describes a set of conformance test specifications for network termination's connected to the Basic Rate ISDN user-network interface.

North American ISDN Users' Forum, ISDN Parameter Groups (NIPG): Phase 1 Simplification, June 1993.

North American ISDN Users' Forum, ISDN Parameter Groups (NIPG): Phase 2 Simplification, June 1993.

Bellcore Special Reports

Special Reports are documents issued by Bellcore to place relevant information in the hands of the telecom industry.

SR-INS-001947 Switched DS1/Switched Fractional DS1 (SWF-DS1) Prospectus, Issue 2, May 1991.

This document describes the features included in NI-1.

SR-NWT-001937 *National ISDN-1*, Issue 1, February, 1991.

This document describes the features included in NI-1.

SR-NWT-001953 *Generic Guidelines for ISDN Terminal Equipment on Basic Access Interfaces*, Issue 1, June 1991, plus Revision 1, December 1991.

This document describes the details of designing terminal equipment for interconnection to an NI-1 network.

SR-NWT-002026 *X.25 Packet Network PAD Support of T3POS,* Issue 1, Sept. 1991.

This document describes the use of X.25 networks for transport of the *Transaction Processing Protocol for Point of Sale (T3POS).*

SR-NWT-002102 *ISDN Deployment Data*, Issue 2, June 1992.

This document describes where to find ISDN access from many public carriers in North America.

SR-NWT-002120 *National ISDN-2*, Issue 1, May 1992. Revision 1, June 1993.

This document describes the features included in NI-2.

SR-NWT-002343 ISDN PRI Generic Guidelines for CPE, Issue 1, June 1993.

This document provides a set of guidelines to allow CPE to be compatible with the network-provided ISDN PRI offerings for NI-2.

SR-NWT-002361 Generic Guidelines for ISDN Terminal Equipment on NI-2 BRI, Issue 1, December 1992.

SR-NWT-002661 National ISDN Generic Guidelines for ISDN Terminal Equipment on BRI, Issue 1, June 1993, Revision 1, August 1993.

This document provides generic guidelines for terminals that offer ISDN capabilities on ISDN Basic Rate Interfaces.

Bellcore Technical Advisories

Technical Advisories are documents that describe Bellcore's preliminary view of proposed generic requirements.

TA-NWT-001219 *ISDN Primary Rate Access Testing Requirements*, Issue 1, July 1991.

This Technical Advisory is of interest for National ISDN-2.

TA-NWT-001270 *Generic Requirements for Call-by-Call Service Selection for Private Facilities, OUTWATS, and INWATS*, Issue 1, February 1992.

This Technical Advisory is of interest for National ISDN-2.

TA-NWT-001281 *ISDN Parameter Downloading Generic Requirements*, Issue 1, April 1992.

This Technical Advisory is of interest for National ISDN-2.

Bellcore Technical References

Technical References are documents that describe Bellcore's proposed generic requirements. The following list includes proposed generic requirements for network equipment to implement the features and services of National ISDN.

TR-TSY-000205 *ISDN Electronic Key Telephone Service*, Issue 1, December 1988, plus Supplement 1, August 1990.

TR-TSY-000268 *ISDN Access Call Control Switching and Signaling Requirements*, Issue 3, May 1989, plus Supplement 1, June 1990, Bulletin No. 2, August 1991, and Revision 1, February 1992.

TR-TSY-000301 *Public Packet-Switched Network Generic Requirements (PPSNGR)*, Issue 2, December 1988, plus Bulletin No. 1, December 1989, Supplement 1, June 1990, and Revision 1, May 1992.

TR-TSY-000393 *ISDN Basic Access Digital Subscriber Lines*, May 1988.

TR-NWT-000394 *Switching System Requirements for Interexchange Carrier Interconnection Using the Integrated Services Digital Network User Part (ISDNUP)*, Issue 3, August 1991.

This Technical Reference is of interest for trunk side interfaces.

TR-NWT-000397 *ISDN Basic Access Transport System Requirements,* Issue 2, January 1991

TR-NWT-000444 *Switching System Requirements Supporting ISDN Access Using the ISDN User Part*, Issue 2, November 1990, plus Bulletin No. 1, August 1991.

This Technical Reference is of interest for trunk side interfaces

TR-NWT-000793 *ISDN D-Channel Exchange Access Signaling and Switching Requirements (Layer 2)*, Issue 1, October 1988.

TR-TSY-00845 User-to-User Signaling with Call Control, Issue 1, December 1988, Supplement 1, June 1990, Bulletin No. 1, April 1992.

TR-TSY-000846 *ISDN X.25 Supplementary Services*, Issue 1, December 1988, plus Supplement 1, June 1990.

TR-TSY-000847 *ISDN Features - Common Switching and Signaling Generic Requirements*, Issue 1, December 1988, plus Supplement 1, June 1990 and Bulletin No. 1, July 1991.

TR-TSY-000849 *ISDN Basic Business Group Structure*, Issue 1, December 1988, plus Supplement 1, June 1990.

TR-TSY-000850 *ISDN Business Group Dial Access Features*, Issue 1, December 1988, plus Supplement 1, June 1990.

TR-TSY-000853 *ISDN Call Forwarding*, Issue 1, December 1988, plus Supplement 1, June 1990, Supplement 2, December 1990, and Bulletin No. 2, April 1992.

TR-TSY-000854 *ISDN Call Pickup,* December 1988

TR-TSY-000855 *ISDN Automatic Callback,* December 1988

TR-TSY-000856 *ISDN Hold Capability for Managing Multiple Independent Calls*, Issue 1, December 1988, plus Supplement 1, September 1990.

TR-TSY-000857 *Additional Call Offering for Managing Multiple Independent Calls*, Issue 1, December 1988, plus Supplement 1, June 1990.

TR-TSY-000858 *Flexible Calling for Managing Multiple Independent Calls*, Issue 1, December 1988.

TR-TSY-000859 *ISDN Multiline Hunt Group*, Issue 1, December 1988, plus Supplement 1, June 1990.

TR-TSY-000860 *Calling Number Identification Services*, Issue 1, February 1989, plus Supplement 1, June 1990, and Supplement 2, December 1991.

TR-TSY-000861 *ISDN Layer 3 Protocol Details for the Support of Supplementary Services*, December 1988; Supplement, June 1990

TR-NWT-000865 *Generic Requirements for ISDN Display for Call Control and Selected Services*, Issue 1, March 1991.

TR-NWT-000866 *ISDN Message Service Generic Requirements*, Issue 1, January 1991, plus Bulletin No. 1, October 1991.

TR-TSY-000905 *Common Channel Signaling (CCS) Network Interface Specification*, Issue 3, November 1992.

This Technical Reference is of interest for identifying the SS7 protocol and procedures associated with ISDN and non-ISDN call control in exchange access services.

TR-NWT-001187 *ISDN Calling Number Identification Services for Primary Rate Interfaces*, Issue 1, March 1992.

This Technical Reference is of interest for National ISDN-2.

TR-NWT-001203 *Generic Requirements for the Switched DS1/Switched Fractional DS1 Service Capability from an ISDN Interface (SWF-DS1/ISDN)*, Issue 1, December 1991.

This Technical Reference is of interest for National ISDN-2.

TR-NWT-001268 *ISDN Primary Rate Interface Call Control Switching and Signaling Generic Requirements for Class II Equipment*, Issue 1, December 1991, Revision 1, December 1992.

This Technical Reference is of interest for National ISDN-2.

TR-NWT-1270 Generic Requirements for Call-by-call Service Selection for Non-ISDN Foreign Exchange Facilities, Non-ISDN Tie Trunks, OUTWATS, and INWATS, Issue 1, May 1992.

TR-NWT-001281 ISDN Parameter Downloading Generic Requirements, Issue 1, October 1992.
